Subject: Request for a gratis copy
of "Polar Regions Atlas".

Gentlemen,

It has come to my attention from the magazine on "Cold Regions Science and Technology" that your Agency did produce a publication in 1978 entitled "Polar Regions Atlas." For some 30 years I have been engaged in frost action and soil moisture migration studies upon freezing, have done research on these topics (sponsored by the National Science Foundation), have published more than 80 publications on frost action in soils, and have taught graduate courses in Thermal Soil Mechanics at Rutgers University.

In this connection, I should like to request to mail to me a gratis copy of the "Polar Regions Atlas " to support my continued work in thermal soil mechanics.

Hoping that I qualify for the above mentioned publication, I remain,

Respectfully yours,

Alfreds R. Jumikis
Alfreds R. Jumikis
Professor Emeritus of Rutgers University
(Thermal Soil Mechanics and
Geotechnical Engineering).
